POLICY 110
FUND BALANCE CLASSIFICATIONS (PURSUANT TO GASB STATEMENT 54)

Background: GASB has issued Statement No. 54, Fund Balance reporting and Governmental Fund Type Definitions (GASB 54). The objective of this Statement 54 is to enhance the usefulness of fund balance information by providing clearer fund balance classifications that can be more consistently applied.

In accordance with the NYS Comptroller’s recommendation, fund balance amounts will be reported by the Library according to the following classifications:

Nonspendable – consists of assets that are inherently nonspendable in the current period either because of their form or because they must be maintained intact, including prepaid items, inventories, long-term portions of loans receivable, financial assets held for resale, and principal of endowments.

Restricted – consists of amounts that are subject to externally enforceable legal purpose restrictions imposed by creditors, grantors, contributors, or laws and regulations of other governments, or through constitutional provisions or enabling legislation. Because the State regulates the establishment, funding and use of reserves, generally, reserves will be classified as restricted fund balance.

Committed – consists of amounts that are subject to a purpose constraint imposed by a formal action of the government’s highest level of decision-making authority before the end of the fiscal year, and that require the same level of formal action to remove the constraint. The New York State Office of the State Comptroller at the present time believes that in New York State, Libraries will not have any committed fund balance.

Assigned – consists of amounts that are subject to a purpose constraint that represents an intended use established by the board or by its designated official. The purpose of the assignment must be narrower than the purpose of the general fund, and in funds other than the general fund, assigned fund balance represents the residual amount of fund balance. Assigned Fund Balance generally includes encumbrances and appropriated fund balance.

Unassigned – represents the residual classification for the government’s general fund, and could report a surplus or deficit. In funds other than the general fund, the unassigned classification should be used only to report a deficit balance resulting from overspending for specific purposes for which amounts had been restricted, committed, or assigned.
General Policy

Fund balance measures the net financial resources available to finance expenditures within current or future periods. The Library’s Unassigned General Fund Fund Balance will be maintained to provide the Library with financial stability and a margin of safety to fund unanticipated contingent expenditures that may occur unexpectedly during the fiscal year. The Unassigned General Fund Balance used for these purposes may only be appropriated by resolution of the Board of Trustees.

Any portion of Fund Balance may be applied or transferred for a specific purpose by formal action of the Board of Trustees. Amendments or modification to the applied or transferred fund balance must also be approved by formal action of the Board of Trustees.

The Board of Trustees shall delegate the authority to assign fund balance, for encumbrance purposes, to the person(s) to whom it has delegated the authority to sign purchase orders.

Recommended by Comptroller

In circumstances where an expenditure is incurred for a purpose for which amounts are available in multiple fund balance classifications (e.g., expenditures related to reserves):

The expenditure is to be spent first from the restricted fund balance to the extent appropriated by either budget vote or board approved budget revision and then from the unrestricted fund balance. Expenditures incurred in the unrestricted fund balances shall be applied first to the assigned fund balance to the extent that there is an assignment and then to the unassigned fund balance.
